

Drum Clamp

Drum Clamp - Forklifts are meant to handle storing, lifting and moving pallets. For businesses that deal with products inside drums, you have to make use of an attachment to be able to move, lift and store them. There are several drum forklift attachments that you could acquire for all of your drum moving, lifting and storing needs. These attachments are specially utilized so as to deal with drum containers - thus there is no risk of damage to the product or drum container whenever they are lifted, stored or moved.

Drum Positioner And Grab

The drum positioner is existing in three or four tine models. They are operational for the unloading and loading of drums off vehicles, drum stands and racks. This particular accessory is completely automatic, thus enabling the individual operating it to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This attachment is utilized for drum pyramid stacking.

The drum grab is fork designed and mounted with the sole objective of dealing with steel drums that have rolling hoops. Though the reason for the design was to handle steel drums with rolling hoops, the drum grab could accommodate the transporting of large and extra large plastic drums. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

The Rotator

The drum rotator is actually a lift truck attachment that mounts on to the forks themselves. The objective of the drum rotator is to be able to lift the drum and rotate it upside down. The drum fits in to the rotator utilizing a steel clamp that fits over the center of the drum. The rotation is executed by either a continuous loop chain or a crank handle. The crank handle is used for operations that take place below shoulder level. For operations which must occur higher than shoulder level, the continual loop chain will be used.

Drum tines are straightforward fork mounted accessory which can be meant for stacking and unstacking 210-liter metal drums. Stacking involves nothing intricate, merely simple horizontal positioning of the drums. The carriage-mounted enhancements reduce the load center of the drums.

Automatic Tongs

Drum tongs come in semi-automatic and automatic units. They are utilized in the tight head or open topped steel drum kinds. The drum pincers can be attached in a few ways to the forklift. One method is to attach them beneath a fork-mounted hook. Another way is to connect them to a fork-mounted jib or a carriage mounted jib. Either the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no need for the individual operating it to ever leave the seat of the forklift.

Rim Grip Handler

When drums need storage space with limited spacing available, the Rim Grip Drum Handler is the best option in drum forklift accessories. This attachment will work for both the two hundred ten liter drums in addition to one hundred twenty liter drums. The Rim Grip Handler functions by utilizing steel jaws so as to grab the edge of the drum. It lifts the drum and puts it down without requiring any room between all of the drums. The typical model in the industry is a zinc-plated handler, even if, this particular accessory comes obtainable in stainless steel for the food and drink market.
