

Aerial Work Platforms

Aerial Work Platforms - There are a lot of accessories used for forklifts that can be utilized so as to help expand the functionality of your forklift and allow you to lift objects, handle materials with greater ease or to complete clean-up jobs.

Many of the accessories are particularly designed to fit on the forks themselves. Fork extensions for instance, are utilized whenever you need a lot more fork length, which increases lifting capacity. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are one more kind used when transporting rolled material in order to make sure it does not roll off of the traditional flat forks.

Examples of lifting accessories include pivoting and telescoping crane or boom accessories. They could come in a number of various styles and are most often utilized for transferring metal bars, lumber, poles and various kinds of bulky stuff. Additional accessories such as different styles of hook plates and hooks are offered in order to carry objects making use of a chain or sling. Magnetic lifters and slab lifters are other stuff which can be utilized together with hook attachments. Slab lifters are specialized attachments which are intended for carrying a variety of materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift to be able to make transporting rolls of carpet much easier. The accessory connects onto the lift truck's forks and has a pole which goes through the middle of the carpet roll.

There are many various kinds of forklift accessories that can be intended for facility maintenance such as snow blades. These blades attach to front end loaders and can move materials like soil, snow and dirt. Other common cleanup attachments comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the lift truck forks connect onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up simple and quick.

Material spreaders are other attachments used on forklifts. These spreaders are useful for various applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting accessory which a lot of companies make use of everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform models have added space for employees to be able to carry tools and other necessary items for the task. Often work platforms are constructed of poly material or steel.
